1. Aesthetic Direction & Design Philosophy

Healthcare interfaces require a balance of **clinical clarity, calm reassurance, and unmistakable status signaling**. The visual design for PHRMS uses a clean, modern medical dashboard layout with generous whitespace, high-contrast typography, and semantic color coding derived strictly from the selected **Medical Logo Color Palette**.

2. Official Color Palette Specification

All UI components, role headers, status badges, and interactive buttons are mapped to your six core medical colors:

Swatch	Color Name	Hex Code	Brand Keywords	UI & Semantic Role in PHRMS
	Surgical Blue	`#007BA7`	*Calm, Heal, Help, True, Care*	**Primary Brand & Patient Portal Accent:** Primary action buttons, active navigation states, links, timeline connectors, and `Correction Requested` highlights.
	Trust Teal	`#008080`	*Safe, Wise, Help, Cool, Heal*	**Secondary Brand, Doctor & Review Team Accent:** Top navigation bar gradients, Doctor Portal header, Consultation Summary header banners, and security/shield icons.
	Health Green	`#4CAF50`	*Grow, Safe, Pure, Live, Hope*	**Positive / Approved Semantic State:** `Approved` document status badges, `Access Granted` doctor toggles, Reviewer "Approve Document" button, and verified timeline checkmarks.
	Clean White	`#FFFFFF`	*Pure, Neat, Soft, Open, Calm*	**Primary Surface Color:** Card backgrounds, modal surfaces, consultation summary sheet background, and primary text on dark (`#007BA7` / `#008080`) headers.
	Cool Gray	`#A9B0B3`	*Mild, Soft, Calm, Easy, True*	**Neutral & Structural Elements:** Borders, timeline rails, disabled states, `Pending Review` neutral badges, muted metadata labels, and subtle background tints (`#F4F7F8` app canvas).
	Aid Red	`#D62828`	*Fast, Warn, Help, Rush, Bold*	**Critical / Rejection / Revoke State:** `Rejected` document badges, "Revoke Doctor Access" buttons, Reviewer "Reject" actions, and **Known Allergies** clinical warning alerts.

CSS Custom Properties (Theme Tokens)

- `--surgical-blue: #007BA7` (Dark hover: `#005f82`, Light tint: `#e6f4f9`)
- `--trust-teal: #008080` (Light tint: `#e6f2f2`)
- `--health-green: #4CAF50` (Light badge tint: `#e8f5e9`)
- `--clean-white: #FFFFFF` (Primary card & sheet surface)
- `--cool-gray: #A9B0B3` (App canvas tint: `#F4F7F8`, Primary text: `#1E293B`)
- `--aid-red: #D62828` (Light alert tint: `#fdeaea`)

3. Typography & Iconography

- **Primary Font Stack:** `'Inter', 'Plus Jakarta Sans'`, or system sans-serif for crisp legibility at both desktop and laptop resolutions.
- **Monospace Font:** `'JetBrains Mono'` or `monospace` for Record IDs, Audit Log timestamps, and Reference Codes.
- **Typographic Hierarchy:**
  - **Page Titles:** `1.5rem` (24px), Semi-Bold (`600`), `#1E293B`
  - **Section / Card Headers:** `1.125rem` (18px), Semi-Bold (`600`), `#007BA7` or `#008080`
  - **Body Copy & Clinical Notes:** `0.9375rem` (15px), Regular (`400`), line-height `1.6`
  - **Metadata & Badges:** `0.75rem` (12px), Uppercase tracking `0.04em`, Bold (`700`)

4. Core UI Component Specifications

4.1 Role-Differentiated Top Header & Quick Switcher

To make your **Project Demo (Week 7 & Week 11)** seamless, the top navigation bar displays the current user's name and a prominent role badge:

- **Patient View:** **Surgical Blue (`#007BA7`)** theme accent.
- **Document Review Team View:** **Trust Teal (`#008080`)** administrative workspace accent.
- **Doctor View:** Deep **Surgical Blue** to **Trust Teal** gradient (`#007BA7` → `#008080`) clinical header.
- **Demo Role Switcher:** Allows demonstrating submitting a document as a Patient, approving it as the Review Team, and viewing the resulting timeline as an Authorized Doctor in seconds without re-typing passwords.

4.2 Vertical Chronological Health Timeline

- A vertical left-hand rail in **Cool Gray (#A9B0B3)** with circular node markers in **Surgical Blue (#007BA7)** and **Health Green (#4CAF50)** checkmarks.
- Each node expands into a **Clean White (#FFFFFF)** card with a subtle left border (`4px solid #007BA7`), displaying:
  - **Top Row:** Medical Event Date (prominent badge), Document Category Pill, and Healthcare Provider name.
  - **Middle Row:** Document Title and structured Clinical Summary / Vitals.
  - **Bottom Row:** "Verified by Document Review Team" stamp in **Health Green (#4CAF50)** and a button to open the attached medical document preview modal.

4.3 Consultation-Ready Summary Sheet

- Styled like an official clinical briefing document on a **Clean White (#FFFFFF)** sheet with a **Trust Teal (#008080)** header band.
- Features a high-visibility **Aid Red (#D62828)** callout box for **Known Allergies**, a structured **Chief Complaint** section, and a condensed chronological table of the patient-selected records with a one-click **Print Consultation Summary** action.
